Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	13 / 08 / 2026

Daily Report Fields

Today I Learned	Today, I learned how to build a complete RAG question-answering assistant by connecting a retriever, Supabase Vector Store, and an LLM to generate grounded answers with source references and a safe fallback.
Today I Built / Practiced	Built a Company / HR Policy Assistant that retrieves relevant knowledge from Supabase, answers questions using only the retrieved context, returns source references, and provides an "Information not available in the knowledge base" fallback for unknown questions.
Technologies / Tools Used	n8n, Google Sheets, Supabase, pgvector, AI Embeddings, Recursive Character Text Splitter
Problem(s) Faced	The workflow initially failed due to a missing match_documents function, an ambiguous SQL column reference, and an unsupported temperature parameter in the chat model.
How I Solved Them	Created and corrected the match_documents SQL function in Supabase, qualified the table columns properly, and removed the unsupported temperature parameter from the chat model configuration.
Task Status	Completed
GitHub / Workflow Link	https://github.com/MuhammadBinWaseemm/AI-Automation-Internship-Pentalnex-Pvt.-Ltd/tree/main/daily-logs/DAY-21

Plan for Next Day	Looking forward to working with RAG.
