

PETALNEX PVT LTD

Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	22 / 08 / 2026

Daily Report Fields

Today I Learned	Today, I learned about monitoring, debugging, logging, workflow optimization, reducing unnecessary AI/API usage, and improving workflow performance.
Today I Built / Practiced	Optimized an existing AI Customer Support workflow by verifying deterministic priority routing, adding an explicit normal path, and implementing PII-safe execution and error logging.
Technologies / Tools Used	n8n, Groq API, IF Node, Code Node, Execution History, Error Logging
Problem(s) Faced	No redundant AI call was present to remove, as priority routing was already handled using deterministic IF logic.
How I Solved Them	Reviewed the workflow and improved its observability instead by adding PII-safe logging, error logging, and an explicit normal-priority branch.
Task Status	Completed
GitHub / Workflow Link	https://github.com/MuhammadBinWaseemm/AI-Automation-Internship-Pentalnex-Pvt.-Ltd/tree/main/daily-logs/DAY-29
Plan for Next Day	Looking forward to week-5 assignment.
