

PETALNEX PVT LTD

Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	06 / 08 / 2026

Daily Report Fields

Today I Learned	I learned how to integrate a Large Language Model (LLM) into an n8n workflow using the Basic LLM Chain and a Groq Chat Model. I also learned the difference between using a basic LLM chain and an AI Agent, how to pass dynamic input using expressions ({{\$json.email}}), and how to route workflow execution based on AI-generated classifications using a Switch node.
Today I Built / Practiced	I built an AI Email Classification workflow that accepts an email, sends it to a Groq LLM for analysis, classifies it into one of six categories (Sales, Support, Complaint, Invoice, Spam, or General), and routes the workflow to the appropriate branch using a Switch node. Each branch returns a corresponding classification message through an Edit Fields node.
Technologies / Tools Used	n8n, Basic LLM Chain, Groq Chat Model (Llama 3.3 70B Versatile), AI Nodes, Switch Node, Edit Fields (Set), JSON, Expressions, Prompt Engineering
Problem(s) Faced	None.
How I Solved Them	This was easy.
Task Status	Completed
