

PETALNEX PVT LTD

Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	27 / 07 / 2026

Daily Report Fields

Today I Learned	I learned the fundamentals of REST APIs, including endpoints, requests, responses, and common HTTP methods such as GET, POST, PUT, PATCH, and DELETE. I also learned about HTTP status codes (200, 201, 400, 401, 403, 404, 429, and 500), request headers, and how JSON data is structured and returned by an API. Using Postman, I explored a public API, inspected its request and response, and observed how incorrect endpoints return error responses.
Today I Built / Practiced	I used Postman to interact with a public Quotes API. I sent a GET request, examined the request URL, method, and headers, analyzed the JSON response, and tested an invalid endpoint to observe and understand the returned HTTP error code. I also documented my findings with screenshots for the assignment.
Technologies / Tools Used	Postman, REST API, HTTP, JSON, Public API (DummyJSON Quotes API)
Problem(s) Faced	None.
How I Solved Them	This was easy.
Task Status	Completed

GitHub / Workflow Link	https://github.com/MuhammadBinWaseemm/AI-Automation-Internship-Pentalnex-Pvt.-Ltd/tree/main/daily-logs/DAY-06
Plan for Next Day	Plan to integrate the apis in n8n.
