

Tool	Description
Company Knowledge Base	Searches the Supabase vector knowledge base for internal company/HR information such as leave, attendance, working hours, and internship policies.
get_current_bitcoin_price	Uses an HTTP/API request to retrieve the current Bitcoin price from an external API.
save_user_preference	Stores non-sensitive user preferences that the user explicitly asks the agent to remember.
get_user_preference	Retrieves previously stored non-sensitive user preferences.
Simple Memory	Maintains conversation context so the agent can remember information from earlier turns in the same conversation.
Human Confirmation Boundary	Prevents sensitive actions from being performed automatically and requires explicit human confirmation.
