Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	25 / 07 / 2026

Daily Report Fields

Today I Learned	I learned how to integrate Google Sheets with n8n to read application data, validate records, process them using conditional logic, update the spreadsheet, and send personalized emails through an automated workflow. I also learned how to use expressions to dynamically reference spreadsheet values in different nodes.
Today I Built / Practiced	I built an Internship Application Processing workflow that reads candidate records from Google Sheets, validates the application data, categorizes candidates as Shortlisted, Needs Review, or Not Eligible based on eligibility criteria, updates the status in the Google Sheet, and sends personalized email notifications to each applicant.
Technologies / Tools Used	n8n, Google Sheets, Gmail/Email Node, IF Node, Code Node (JavaScript), JSON, Workflow Automation
Problem(s) Faced	I faced challenges connecting Google Sheets with n8n and understanding how to validate records before processing them. I also needed to configure conditional routing correctly so that each candidate received the appropriate status and email.
How I Solved Them	I connected Google Sheets using Google credentials, used an IF node to validate the required fields, implemented the eligibility logic in a Code node, updated the Status column in the spreadsheet, and configured the email node to send personalized messages using expressions.

Task Status	Completed
GitHub / Workflow Link	https://github.com/MuhammadBinWaseemm/AI-Automation-Internship-Pentalnex-Pvt.-Ltd/tree/main/daily-logs/DAY-05
Plan for Next Day	Looking forward with weekly assignment screening automation.
