Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	20 / 08 / 2026

Daily Report Fields

Today I Learned	Today, I learned about API key and credential management, environment variables, authentication vs authorization, least privilege, PII handling, and webhook security in n8n.
Today I Built / Practiced	Security-audited Week 1–4 workflows, moved hardcoded secrets into credentials/env variables, and added a header-based secret check to secure a webhook.
Technologies / Tools Used	n8n, HTTP Request, Error Trigger, Gmail, Retry/Error Handling, Error Logging
Problem(s) Faced	Had trouble securing the webhook — initially unsure how to enforce authentication on an otherwise open endpoint.
How I Solved Them	Enabled Header Auth on the Webhook node with a secret key/value credential, requiring callers to send the correct header before the workflow triggers.
Task Status	Completed
GitHub / Workflow Link	https://github.com/MuhammadBinWaseemm/AI-Automation-Internship-Pentalnex-Pvt.-Ltd/tree/main/daily-logs/DAY-27
Plan for Next Day	Looking forward to week-5 work.
