Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	17 / 08 / 2026

Daily Report Fields

Today I Learned	Today, I learned how a complete RAG system separates knowledge ingestion from question answering, with embeddings stored in a vector database and retrieved later by an AI Assistant.
Today I Built / Practiced	Extended the Company Knowledge AI Assistant for the Day-24 assignment and prepared the knowledge ingestion pipeline to load 50 company knowledge entries from Google Sheets into Supabase for retrieval.
Technologies / Tools Used	n8n, Google Sheets, Supabase Vector Store, OpenAI Embeddings, AI Agent, RAG, Chat Model
Problem(s) Faced	Understanding the role of the separate ingestion workflow and AI Assistant workflow
How I Solved Them	Understood that the ingestion workflow stores the embedded knowledge in Supabase, while the AI Assistant retrieves and uses that knowledge to generate grounded answers.
Task Status	Completed
GitHub / Workflow Link	https://github.com/MuhammadBinWaseemm/AI-Automation-Internship-Pentalnex-Pvt.-Ltd/tree/main/Company%20Knowledge%20AI%20Assistant%20
Plan for Next Day	Looking forward to week-5 databases and error handling.
