## Internship — Daily Progress Report

|             |                     |
|-------------|---------------------|
| Intern Name | Muhammad Bin Waseem |
| Date        | 31 / 08 / 2026      |

### Daily Report Fields

|                           |                                                                                                                                                                                                                                                                                                           |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Today I Learned           | Today, I learned how to analyze a business requirement, identify process pain points, define a suitable AI automation solution, and establish measurable success criteria.                                                                                                                                |
| Today I Built / Practiced | Defined the requirements for the <b>Company Knowledge AI Assistant</b> capstone, including the problem statement, current process, pain points, proposed solution, architecture, and success criteria.                                                                                                    |
| Technologies / Tools Used | RAG, AI Automation, Vector Database, AI Assistant, n8n                                                                                                                                                                                                                                                    |
| Problem(s) Faced          | No issues.                                                                                                                                                                                                                                                                                                |
| How I Solved Them         | Analyzed the available capstone options and selected the Company Knowledge AI Assistant based on the project's requirements and previous RAG work.                                                                                                                                                        |
| Task Status               | Completed                                                                                                                                                                                                                                                                                                 |
