Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	10 / 08 / 2026

Daily Report Fields

Today I Learned	Today, I learned how to integrate Generative AI into an end-to-end customer support automation workflow using n8n. I learned how to use an LLM to analyze customer messages and generate structured information such as category, priority, sentiment, department, summary, and a suggested response
Today I Built / Practiced	I built an AI Customer Support Triage System in n8n. The workflow follows: Customer Message → Webhook → AI Analysis → Structured JSON → Validation → Switch by Category → Store Ticket → Send Acknowledgment → Urgent Alert The system accepts customer support messages through a Webhook and uses a Groq-powered LLM to classify each message.
Technologies / Tools Used	n8n, Groq API, Llama 3.3 70B Versatile, Webhooks, Structured Output Parser, JSON Schema, Switch Node, IF Node, Google Sheets, Email Automation, Postman, JSON, JavaScript Expressions.
Problem(s) Faced	No issues.
How I Solved Them	This was challenging.
Task Status	Completed
