

PETALNEX PVT LTD

Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	22 / 07 / 2026

Daily Report Fields

Today I Learned	I learned how to create an automated workflow in n8n using Schedule Trigger, Edit Fields (Set), and Send an Email nodes. I also learned how SMTP credentials are used for sending emails.
Today I Built / Practiced	I built a weekday automated reminder workflow that sends a daily internship progress reminder email at a scheduled time.
Technologies / Tools Used	n8n, Schedule Trigger, Edit Fields (Set), Send an Email Node, SMTP (Gmail), JSON Workflow Export
Problem(s) Faced	The email node initially failed because SMTP credentials were not configured. Later, the reminder message appeared as undefined because it was entered in the wrong field
How I Solved Them	I configured Gmail SMTP using an App Password and corrected the email configuration by placing the reminder text in the email body instead of the Email Format field.
Task Status	Completed

Plan for Next Day

I plan to learn all the data types and try different formats for different scenarios.
