Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	14 / 08 / 2026

Daily Report Fields

Today I Learned	Today, I learned how AI Agents differ from fixed workflows and how conversation memory allows an agent to remember information from earlier turns.
Today I Built / Practiced	Modified the HR Policy Assistant to use conversation memory and tested whether it could remember the user's name across messages.
Technologies / Tools Used	n8n, AI Agent, Supabase Vector Store, OpenAI Embeddings, Chat Model, Conversation Memory, RAG
Problem(s) Faced	The initial RAG workflow could not remember personal information because it only searched the knowledge base.
How I Solved Them	Added conversation memory to the workflow and tested it by providing a name in one message and asking for it in a later message..
Task Status	Completed
GitHub / Workflow Link	https://github.com/MuhammadBinWaseemm/AI-Automation-Internship-Pentalnex-Pvt.-Ltd/tree/main/daily-logs/DAY-22
Plan for Next Day	Looking forward to working with RAG.
