

PETALNEX PVT LTD

Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	30 / 07 / 2026

Daily Report Fields

Today I Learned	I learned practical JavaScript concepts required for automation in n8n, including const and let, objects, arrays, functions, template literals, and conditional statements. I also learned how to use array methods such as .map() to transform data and .filter() to keep only the required records. Additionally, I understood how the Code node processes and returns items in n8n workflows.
Today I Built / Practiced	I built a data transformation workflow using only the Code node in n8n. The workflow processed a dataset of 15 records, normalized names by trimming spaces and converting them to Title Case, converted email addresses to lowercase, assigned grades based on candidate scores, and filtered the output to retain only candidates with Grade A or B.
Technologies / Tools Used	n8n, Code Node, JavaScript (ES6), JSON, Manual Trigger
Problem(s) Faced	None.
How I Solved Them	This was easy.

Task Status	Completed
GitHub / Workflow Link	https://github.com/MuhammadBinWaseemm/AI-Automation-Internship-Pentalnex-Pvt.-Ltd/tree/main/daily-logs/DAY-09
Plan for Next Day	Looking forward to learning webhooks.
