Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	24 / 07 / 2026

Daily Report Fields

Today I Learned	I learned how to use flow logic in n8n by routing data through different branches using the Switch node. I also learned how to use Edit Fields to modify data by adding new fields while preserving the original records.
Today I Built / Practiced	I built a workflow that processes 10 sample records, routes them into Excellent, Good, and Needs Improvement groups using a Switch node, and attaches group and next action fields to each record using Edit Fields nodes.
Technologies / Tools Used	n8n, Manual Trigger, Code Node (JavaScript), Switch Node, Edit Fields (Set), JSON, Workflow Routing
Problem(s) Faced	I initially had difficulty configuring the Switch node because the routing rules were set in the wrong order, and the newer n8n interface differed from older tutorials. I also had to understand how to route records into three separate branches correctly.
How I Solved Them	I corrected the routing rules in the Switch node, connected each output branch to a separate Edit Fields node, and configured each branch to add the appropriate group and next action fields while keeping the original record data.
Task Status	Completed

GitHub / Workflow Link	https://github.com/MuhammadBinWaseemm/AI-Automation-Internship-Pentalnex-Pvt.-Ltd/tree/main/daily-logs/DAY-04
Plan for Next Day	I plan to learn how to connect google sheets and deal with email automation which I did on the first to second day.
