

PETALNEX PVT LTD

Internship — Daily Progress Report

Intern Name	Muhammad Bin Waseem
Date	05 / 08 / 2026

Daily Report Fields

Today I Learned	I learned the fundamentals of Prompt Engineering and how structured prompts produce more reliable AI responses than vague instructions. I studied the prompt framework consisting of Role → Context → Task → Rules → Output Format → Examples, along with the importance of few-shot prompting, explicit constraints, and strict JSON output formats for automation workflows.
Today I Built / Practiced	I created a reusable prompt library containing five automation prompts for Lead Qualification, Email Classification, CV Analysis, Complaint Classification, and Support Reply Generation. Each prompt was designed with clear instructions, strict JSON output requirements, and tested against three different sample inputs to verify consistent responses.
Technologies / Tools Used	Prompt Engineering, Large Language Models (LLMs), Google Gemini Prompting Concepts, Anthropic Claude Prompting Concepts, JSON, Structured Prompt Design, Microsoft Word
Problem(s) Faced	None.
How I Solved Them	This was easy.
Task Status	Completed
GitHub / Workflow Link	https://github.com/MuhammadBinWaseemm/AI-Automation-Internship-Pentalnex-Pvt.-Ltd/tree/main/daily-logs/DAY-14

Plan for Next Day	Looking forward to Day-15.
